

PROPERTY SURVEYOR

C Le Masurier Limited is a property investment and development Group that invests, develops and trades property in Jersey, the United Kingdom and Continental Europe as its main course of business.

The Group is relatively small in terms of staff numbers but has a substantial property portfolio and is extremely active in developing and maximising the potential of property to create capital growth and sustainable, long term, secure income from rentals.

As a result of growth in the breadth and complexity of the Group's activities, the properties it holds and the locations in which the properties exist, there is a need for additional support through the recruitment of a new Property Surveyor to manage the assets that the Group has as effectively as possible.

Applicants will be qualified Chartered Building Surveyors with a property management background, ideally gained within Jersey and the United Kingdom, with experience of property management and property investment and development in a similar type of business.

Applicants should contact Bob Hassell in the strictest confidence to discuss the role further and to obtain a full role description.

The successful applicant will be expected to keep abreast of developments in property management in order to maintain their professional knowledge and to be able to use these skills proactively in their work. The Group will provide support in achieving this objective.

The postholder will be a proactive and energetic individual with drive and enthusiasm to meet the needs of the business. This will demand a strong commitment to meeting deadlines and quality standards and expectations that ensure the effective management of the function across the whole portfolio.

Strong interpersonal skills are required to enable effective working relationships with a wide range of professional agents, advisors and consultants.
